

Rambling Rose Shawl

Part Four

4.5mm & 4mm Hook

UK Terms

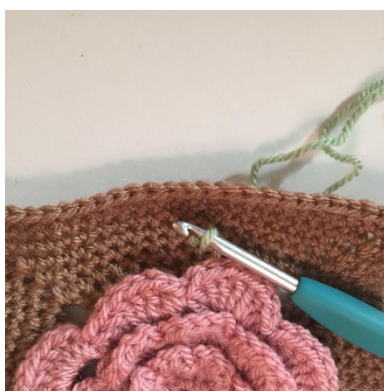

Vines & Leaves

To create the vines you will surface crochet onto your panels. This is where you can have some fun and make your shawl your own, after all no two vines are identical. Below I will show you how to surface crochet and give you some examples of the vines I made.

Surface Crochet

Color D

Working into the panels; insert your hook through your fabric so your hook comes out the other side. Attached your yarn to your hook and pull a loop through your fabric, now insert your hook again in the direction you wish to go. Yarn over (behind your fabric) and pull loop through your fabric and the loop on your hook like a slip st. Continue in this motion to create a track of surface slip stitches

Rambling Rose Shawl

Work your scrolls in-between your roses but leave the last edge/join free. This is where you will do your corner scroll after you have joined your panels.

Tip: When sewing your ends in, sew in on reverse side of panels. Follow the tracks that your scrolls made for a neat and tidy finish

Join to Main Shawl

Color C

Before you continue with the decorative leaves, you need to attach the panels to the main shawl. Work on the wrong side of shawl and panels. Check to make sure you join your panels using the join edge we created in part 3.

Short panel first.

Start in the first stitch of you shawl and panel

Work one dc into the both loops of each corresponding stitch

Your shawl has 209 dc's on the side and your panel has 208.

Make one extra dc in the last stitch.

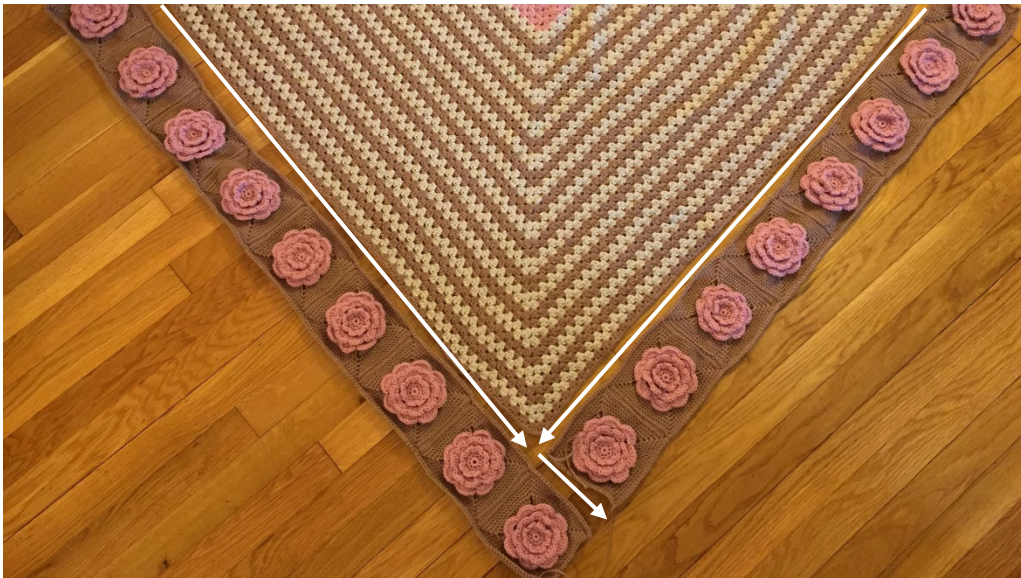

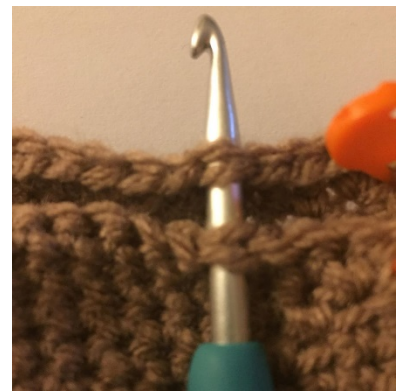

Total = 209 dc

Long panel second

* Work one dc into the loops of each corresponding stitch down the edge of you shawl then continue on joining the end of your short panel for 234 stitches*

Total = 234 dc

Fasten Off

Corner Scrolls/Vines

Now that your panels are attached to your shawl you can finish the corner scrolls/vines. Again, make it your own and have fun.

Leaves

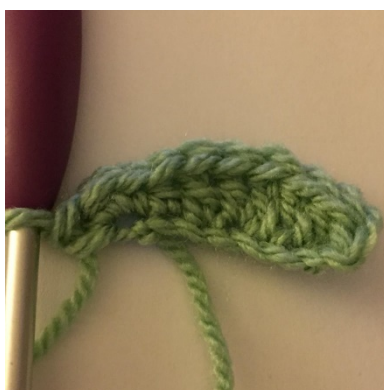

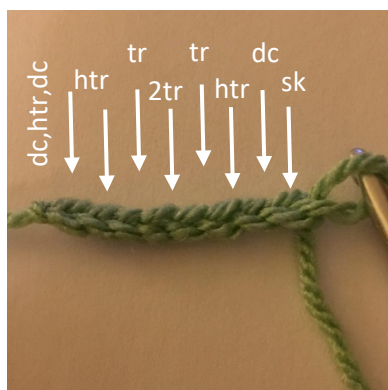

Decorative leaves. You can use as many leaves as you choose to decorate your roses. I have used a combination of Large and Small leaves. See examples below.

With Color D

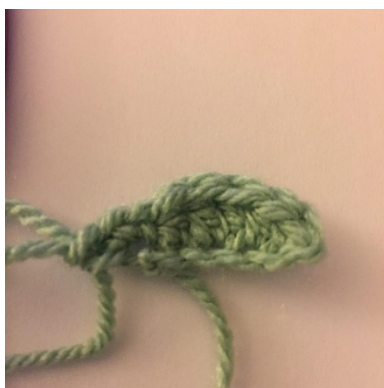

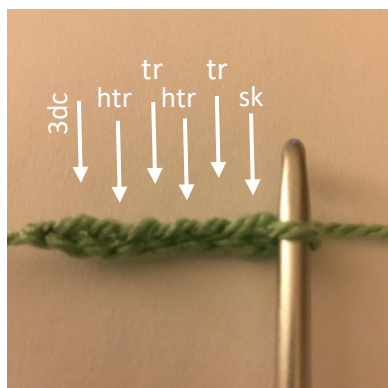

Large Leaf

Chain 8, dc in 2nd chain from hook, working down the chain, htr, tr, 2tr, tr, htr, you should have one chain left. In the last chain (dc, htr, dc). Work back up on the opposite side of chain – htr, tr, 2tr, tr, htr. Join with a sl st to first dc. Cut a tail about 8" long for sewing leaves onto shawl.

Small Leaf

Chain 6, dc in 2nd chain from hook, working down the chain, htr, 2tr, htr, you should have one chain left. In the last chain 3dc . Work back up on the opposite side of chain – htr, 2tr, htr. Join with a sl st to first dc. Cut a tail about 8" long for sewing leaves onto shawl.

Tip: Sew your beginning tail up and down the spine of the leaf for a neat finish. Leave your long tail for attaching your leaves.

Attach Leaves

Position leaves, using the long tail sew to shawl.
